

Thinking of Herbals?

Check Carefully Before You Take Them With Medicines

FACT: More than 40 percent of Americans take dietary supplements

FACT: Some dietary supplements are known to interact in dangerous ways with medicines.

FACT: Mixing herbal supplements with your medicines may put you at risk.

Check It Out! The following list shows some (not all!) potential drug-herbal interactions for 10 popular herbs. Many are potentially dangerous interactions, such as the case of a 78 year-old woman on a blood thinner who reportedly on her own took gingko biloba for 2 months before having a serious brain hemorrhage. Some herbals may add to the effects of drugs (noted by + in list below). But these additive effects generally have not been well studied. **So think carefully!** Ask your doctor or pharmacists before mixing herbals with your drug therapy.
